

Calgary EcoSchools May Calendar of Events

This month check out our workshop on Indigenous perspectives on sustainability, or drop in on one of our EcoSchools information sessions. Don't forget, the first week of May is [International Compost Awareness Week](#), May 20 is [World Bee Day](#), and May 22 is the [International Day of Biological Diversity](#).

Questions about EcoSchools? Email marie@abcee.org or click [here](#) to schedule a meeting at a time that works for you.

24	25	26	27	28

May Session Descriptions

- [Exploring Sustainability Through an Indigenous Lens: Getting Started with Secondary Students](#) - In this two-part workshop series, explore the concept of sustainability and our relationship to the natural world through both western and Indigenous lenses. Drawing on authentic resources, learn how you can weave Indigenous perspectives into your everyday teaching in a way that engages the cognitive, physical, emotional and spiritual self and fosters deep learning around the notion of sustainability.
- [Introduction to Calgary EcoSchools](#) - Find out how you can engage students in environmental stewardship and climate action. Learn how to register your school, use the online platform, and explore 40 EcoSchools actions, each with its own action guide and resources. Remember, there is no obligation to complete actions, even after joining!
- [From Participation to Certification](#) - You made it through your first year with EcoSchools - now learn how to take it farther next year. Join this session to learn how to take full advantage of the program and learn from the successes of other EcoSchools.
