Questions to help guide organizations take steps forward in this important work:

- What voices and narratives are missing?
 - From this program?
 - From this promotion?
 - From the curriculum?
 - From environmental education?
- How can we foster equity in access and program offerings?
- Should someone else be on this platform/in this space instead of us?
 - Why are we in this space?
 - How can we do the opportunity justice?
 - Who should we be accountable to?
 - What methods can we use to bridge the gaps between Western and non-Western ways of knowing/doing?
- How do we set aside time to do the learning and develop plans for moving this forward?
