DO YOU HAVE ANY SUGGESTIONS FOR HOW I CAN BECOME MORE INVOLVED IN CLIMATE ACTION?

1 Identify who is part of your network

Once you take a look at your immediate network, think about the connections those people have.

Ask yourself:

- Where do your family members work?
- What other groups are your classmates part of?
- Where else do people volunteer?

2 Find new people to network with

Attend events hosted by organizations that align with your interests. These can be:

- Virtual
- In-person

Don't forget to bring information about how people can find you to connect after the event (email, LinkedIn, etc.)

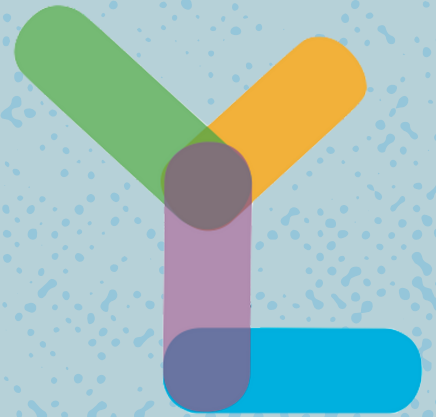

3 Actively network

Once you've identified someone you want to connect with, it's time to reach out to them! Here are a few ways you can reach out to someone:

- Speak to people at events
- Email or "cold call" them
- Connect through social media (Twitter and LinkedIn recommended)
